

- 13 PWDs
- 17 INRMPs
  - 16 Compliant
- Missions Supported
  - MILCONs, NAVAIR, NAVSEA, SERE, ROTH, NSWDC
  - Land Acreage
    - 87K Forest Resources
    - 2.4K Acres of Ag Out lease Lands
    - 18K Wetlands/Water Acreage
- 17 of Federally Listed Species
  - 3 CH exclusions/exemptions
  - # of Candidate species
  - # of Species of Concern
- 18 Natural Resource Managers/Personnel

## Key Programs

- Threatened and Endangered Species Surveys
- Sea Turtle nest surveys
- Forestry/Timber Management
- Wetland delineation/permitting
- Marine Mammal Compliance/Monitoring
- Hunting and Fishing Programs
- Invasive Species Control

## Highlights/Recent Accomplishments (Initiatives, Acquisition Tools, etc)

- Region Bat Database
- GPS Tagging Atlantic Sturgeon
- Sea Turtle BO JEBFS/Dam Neck Annex
- Bald Eagle Aerial Nest Survey CA
- 100% FY19 Funds Execution

## Lessons Learned/Shared

**NEPA Streamline Guidance:** Need to ID projects that were historically EAs where permitting and consultations were contracted services. Moving forward these services will need be competed in-house or paid for by the project. These cost and time can be significant

**Ag Outlease Renewals:** The presence of PFAS in soil, surface and ground water and the absence of DoD/Navy policy regarding PFAS has delayed renewal of all ag leases in the region

## How NAVFAC Midlant Supports the Mission

**Northern Long-Eared Bat:** Provide guidance for timber clearing activities regarding compliance w/Programmatic BO on Final 4(d) Rule for NLEB and activities exempted from take prohibitions

**Atlantic Sturgeon tracking:** Provides current survey data to make and defend effects analysis

**2.4K acres of Ag Outlease:** manage clearzone requirement mission on 2 major runways and ROTHR atteana array at no cost to mission

**Forestry Program (NSACR NWSY NWSE):** Manage large tracks of land for timber production, wildlife/recreation while supporting and enhancing mission activities (buffers, explosive safety arcs)

**Sea Turtle Program (Dam Neck/JEB Ft. Story:** BO with FWS to relocate active nest to non training areas of the beaches resulting in no net loss to mission training

**Bald Eagle Nest Survey:** Document Eagle Nest Location supporting BASH efforts
